### **September 20**

Amita Chudgar, College of Education

### *Understanding the Persistent Under-Investment in Girls’ Education in India, Asking Newer Questions, and Searching for More Solutions*

This presentation will review the current status of girl’s education in India, and highlight that while India is close to gender parity in primary enrollment, large gender gaps still remain in educational investment. Using results from various research studies, the presentation then questions how we may address this persistent under-investment in girls’ education, what innovative approaches may be available, and what missed opportunities we may want to focus on.

### **October 11**

Vanessa Holden, Department of History

### *“Free Issues”: Free Women of Color in Nat Turner’s Southampton County*

Southampton County is famous for being the site of America’s most famous slave rebellion. Often scholarship regarding the event that sent shockwaves from Boston to New Orleans explores the personality of the rebellion’s purported leader, Nat Turner, or the political turmoil known as the Virginia Debates that entailed a serious consideration of the merits of manumission in the state of Virginia. Dr. Holden’s current work on Southampton County foregrounds the community that produced the rebellion to better understand the local experience of loss, grief, and slave resistance. Central to her approach is the place of African American women, free and enslaved, in that community. Dr. Holden’s presentation will explore what the lives of free women of color teach us about the Southampton Rebellion of 1831.

***Something Old, Something New: The Past, Present, and Future of LGBTQ Studies***

Higher education today is full of opportunities to examine and celebrate queer life; the warm reception for LGBT and queer students, faculty, and staff at many colleges and universities—at least in certain quarters of campus—was unthinkable a half century ago. In 2013, LGBTQ student centers abound, hundreds of classes are offered nationwide each semester, and many colleges proudly announce their national recognition for being LGBT-friendly. Dozens of schools offer a major, minor, or certificates in LGBT, queer, and/or sexuality studies; students can even indicate gay and lesbian studies as their intended college major when signing up to take the SAT/ACT. It's a new era for college students, faculty, and staff. Or is it? This talk examines what has and hasn't changed through a comprehensive history of LGBTQ studies and resources offered at universities across the nation.

This Leadership Learning Community will meet monthly beginning in October, featuring one or two

women leaders at each session. These sessions will be lightly structured with some overarching questions we shall pose to many of the speakers, leaving ample time for topics identified by the speaker and informal Q & A by learning community participants. The first session will be used to identify goals and to prioritize speakers and topics for exploration throughout the year and the closing session will be used to reflect on the models of leadership, leadership styles, and lessons learned we have heard through-out the year. Deborah DeZure and Nicole Rovig will facilitate the opening and closing sessions, but members of the LLC will rotate the facilitator role for the sessions with campus leaders. This program is open to 25 participants on a first-come, first-served basis. A waiting list will be maintained if the registration fills prior to the start of the LLC.

# Conferences and Workshops

## ***Framing the Global Conference***

**September 26-28, Bloomington, IN**

<http://framing.indiana.edu/conference/>

Global studies emerged in the 1980s as scholars, policymakers, and the general public began to take note of the increasingly transnational flows of people, ideas, and goods that have come to be identified under the rubric of globalization. Interest in global phenomena has since spread to every discipline in the social sciences and humanities, to become an intellectual touchstone in the academy and beyond. Despite increasing popular and scholarly attention to global issues, no clear consensus has emerged regarding the most fundamental definitions of terms or appropriate empirical methods for studying the global. This conference will explore emerging directions and methodologies for global research. The scholars in the Mellon Foundation-funded Framing the Global project have been addressing this question collaboratively and through their own work, which is characterized by interdisciplinarity, empirical grounding, and a concern with tracing the links between the transnational and the local in a variety of lived, political, discursive, cultural, and social domains. The conference will extend that conversation to include other scholars and practitioners with similar concerns.

## **MSU faculty funding opportunity: *Visiting Scholars To Advance Science (VISTAS)***

Deadline: **September 30**

The Environmental Science and Policy Program at MSU is pleased to announce a new funding opportunity, Visiting Scholars To Advance Science (VISTAS) grants, designed to increase networking opportunities for MSU faculty, bring world-class experts to MSU, and facilitate development of multi-university research proposals in the areas of environmental science, technology, and policy. The VISTAS grants aim to provide support for scholars from other universities and institutions to visit MSU to develop externally funded research proposals jointly with MSU researchers. The grants will cover transportation, housing and per diems for the visiting faculty, allowing them to spend quality time to work with MSU colleagues. VISTAS funding is different from typical seminar support programs and feature longer visiting periods, more intensive interactions with MSU researchers, and explicit goals toward grant proposals. For MSU faculty and researchers, this is a chance to collaborate on proposals, expand professional networks, and enhance the reach of the MSU research brand. We expect a typical award to be \$3,000 for a domestic visitor and \$4,000 for an international visitor. We will consider requests for up to \$10,000 in special cases when proposals involve multiple visitors or an extended stay. Selection criteria include: 1. Nature of the targeted grant. Priority will be given to interdisciplinary research and center-type research initiatives; 2. Expected contribution and academic record of the visiting scholar; and 3. Potential impact of the visitors on the broader MSU environmental research community. To apply for the award, MSU researchers must identify the visitors and the target funding opportunities. They also need to submit an itemized budget for the costs of airfare, lodging and per diem, along with the MSU researcher's and the visitor's curriculum vitae. For more information contact [espp@msu.edu](mailto:espp@msu.edu).
